

A large, close-up image of a human eye with a vibrant green iris, looking directly at the viewer. The eye is partially framed by a thick, curved green line that sweeps across the top and right side of the page.

# PUT YOUR PLASTIC ON LOCKDOWN.

You can never be too careful. So use these sleeves for protecting credit cards, ATM cards or any similar card with magnetic coding from dirt and scratches. They may help avoid the hassle of your cards being damaged or made unreadable.

## AND WHILE YOU'RE AT IT, HELP PROTECT OTHERS TOO.

Keep your eyes peeled for insurance fraud. Spotting and reporting fraud can earn you up to \$25,000 if your tip leads to an arrest. With that kind of cash you'll need to make sure your plastic is in perfect working order.

*Available to Virginia residents only, while supplies last. Virginia State Police reserves the right to substitute items based on availability. VSP is not responsible for issues in delivery through the U.S. Mail or problems due to Internet service.*
